About This Content

Pedestrians, drivers and passengers all around the world agree when it comes to this matter. When you ask them what makes life more interesting they will most certainly give you the same answer –diversity!

With this authentic bus interior DLC consisting of 4 new original color patterns for your seats and classy floor designs you will be the next urban transport trendsetter.

The DLC will visually upgrade the interior of your Citaro buses and also offer your passengers greater seating comfort.

So what are you waiting for? Hop on and take a seat!

Title: Bus Simulator 18 - Mercedes-Benz Interior Pack 1

Genre: Simulation

Developer:

stillalive studios

Publisher:

astragon Entertainment

Release Date: 14 Nov, 2018

a09c17d780

Minimum:

OS: Requires a 64-bit processor and operating system / Windows 7/8/10 64-Bit

Processor: Intel Core i3 with 3.3 GHz or AMD Phenom II X4 with 3.2 GHz

Memory: 6 GB RAM

Graphics: NVIDIA GeForce GTX 750 (1GB VRAM) or AMD Radeon R7 360 (2GB VRAM) or higher

DirectX: Version 11

Network: Broadband Internet connection

Storage: 6500 MB available space

English,French,German,Czech,Japanese,Polish,Russian,Simplified Chinese,Turkish,Korean

It's a revamped Brick Breaker with stages and bosses and different modes of play and it has an amazing soundtrack and other run-on-sentence things.. Short, but interesting and refreshing story of a journey to Ancient Egypt dig site. Amazing voice acting, nice graphics, close to 0 bugs. Co-op mode included, playing in a squad with your friend is the best way to experience this game. Recommended!. The Druid face does not appear in the game collector icon, therefore you cannot fill up your profile with these hot and salty memes. Cannot recommend.. pro :
good game fighting

cons :
add more characters please

. I think that is a decent tower defence game. Reason why I got it is because of two key features

- 1) I am a fan of tower defence I mean who isn't?
- 2) This game weapons and enemies are not OP which is awesome

I bought this game for one reason mainly because Steam Policy says you need to buy "\$5" min to enable to send a friend request.
I think that they should change.

May contain spoilers in my opinion

This game has heroes you get to only choose one at a time to battle along side with you in the tower defence. There are three in all. I think that this feature is awesome in my opinion
note: The vehicles in the game are so hard until I realised that you need to have the lightning tower that owns them

This is a good game

. Great game that tells a detailed story. You really get to know the characters and have empathy. The controls and gameplay is just like GTA series and open world feeling like that. Very detailed realism. The driving is just like GTA as well as shooting and melee.

The racism in the game is a bit over the top, my biggest complaint. I don't have a huge problem with it though because some racism did exist in the later 60s especially down in the south. If it had been cast as happening today I would have turned the game off early on and abandoned it. Some may find the "SJW" contexts here overwhelming but I tolerated it because of the time period in America that the story takes place. Lots of use of the "N" word.

I really enjoyed the story and the voice acting was about as good as it gets IMO. Done well. I don't know why this game got so many bad reviews. The game ran well on my PC too, some complained about it not being optimized, but I had good frame rate etc and most settings were on full. I use a GTX 1080.

The sound in the game is excellent, just like GTA. I played it in Dolby 5.1 on my sound blaster card running through a stereo system. Lots of special work on directional sounds. So much realism.

I got over 70 hours of gameplay doing just about everything. I gave up on winning all of the races, I think I had 3 more to go but they are a pain in the butt to win. You can upgrade Sammy's bar, that is a really cool thing to do and there are some special missions that open up as well as a nice ending that plays. Then you can also run a weed growing operation where you can even grow hybrids. Lots and lots to do in the game. Tons of side missions etc.

It seems like a nice game and I wanted to like it.

But I just can't seem to enjoy playing through it.

This game gets repetitive and boring really fast.

And the tutorial section is basically meaningless.

Overall: I just really can't recommend this game.

It just feels like a prototype of something better.

Well: I'm going to give it a small negative review.. I was playing Lumines via PPSSPP a few days before this came out. I probably still will on handheld. This game is great in any form, but one that is native 4K, super smooth with some extra modes and skins? I'm down.

Well worth the \$15. Incredible puzzle game with entrancing audiovisuals. It's challenging and teaches you via play. Now I'm super hyped for The Tetris Effect for a slightly more zen experience. Lumines can get extremely frantic, but the pacing of the levels is excellent as you get occasional breaks in the frenetic action that give you time to clear your board.. I really enjoyed it! Loved the atmosphere, the story and the characters! Kamal and Eloy are my favorites though! And Rene! She's definitely the best out of the female characters (yea im gonna hold a grudge against Licia for a long time, i just wish the protag has scolded her a bit before forgiving and hugging it out).

The other minus for me is the complete lack of CGs like in the other Winter Wolves game "Colonial Defense" (unless you count one for each romance). I would really love for future games to have more of them. But it still didn't really lessen my enjoyment of the game that much:)

And im gonna be repetitive, but i would love to see a sequel!:D

Saying it all i hope the developer continues making more BL games or at least games that provide such option alongside others.. While admittedly a questionable practice, opening up a complete runestone deck can vastly speed up your talsiman games to more tolerable levels and help keep the AI afloat if you need to give them a handicap. You could do worse with \$4, save yourself some time and pay for the convenience in this case I would say.. You can add custom resources to this, ignore that other review.

VERY useful program, highly recommended! Very easy to use and there are already tons of 'parts' out there on the net to import for use here. If you liked the demo, this is just a more convenient shined up version of it.. I can honestly say I preferred TY #1 overall compared to this however this game is absolutely beautiful and incredibly fun. Thoroughly enjoyable from start to finish and always sad to find out you've completed the game.

I'll be forever glad I discovered these games on Steam. Shame I didn't get to play as a kid but better late than never!

Highly recommend.

9/10. Such a great game.. Very Good Game.. DO NOT BUY THIS GAME!!

I regret big time buying this game, the driving is like driving an ice cube. The graphics not good at all on maxed specs. Same as a Java game. Also not as fast as you think and is pure terrible, I regret big time buying this game,
